

# WRITTEN TEST

## SPACE - COMPETENT PERSON TRAINING

Name: \_\_\_\_\_

Date: \_\_\_\_\_

### Circle the best answer:

1. T F The Confined Space standard for Washington requires the employer to have a written program if they have permitted Confined Spaces.
2. T F Under the regulations, entry into a confined space occurs when any part of the body breaks the plane of the opening.
3. T F A class room could be considered a confined space.
4. T F Most confined spaces are designed to contain a product or a process.
5. T F Welding, cutting and use of cleaning solvents can worsen conditions in a confined space.
6. T F A confined space is always assumed to be permit required unless proved otherwise.
7. T F An attendant is the employee assigned to enter the confined space.
8. T F The authorized entrant is the only person who may sign the Confined Space Permit.
9. T F An opening for a confined space may be as small as 18 inches in diameter.
10. T F One definition of Engulfment is when a worker is surrounded or trapped by a flowable solid.
11. T F Entry permits for Confined Spaces must be kept at least two years.
12. T F The limit for an oxygen deficient atmosphere is 18.5% oxygen.
13. T F Rescue Service for confined space rescue refers only to the in-house rescue team.
14. T F The confined space Permit System was devised to ensure the safety of the attendant.
15. T F Confined Space Entry Permits have no time limit on their use.
16. T F A separate Hot Work Permit is required when doing hot work in a confined space.
17. T F Outside contractors do not have to follow the confined space permitting process when doing work on a customer's site.
18. T F All workers involved in any way with confined space work must be trained.
19. T F Oxygen deficiency in a confined space may be caused by rust.

20. **T F** Never use pure oxygen to ventilate a confined space.
21. A Permit Required Confined Space has all of the following except:
- Limited entry and Exit
  - Large enough for a person to enter.
  - Designed for continuous work
  - Not designed for continuous work
22. All of the following are confined spaces except:
- An open pit mine
  - Silo.
  - Storage tank
  - Manhole
23. Which of the following if present categorize the confined space as Permit Required?
- Flammable Atmosphere
  - Toxic Atmosphere
  - Engulfment Hazard
  - All of the above
24. All of the following are engulfment hazards except:
- Sawdust
  - Large boulders
  - Sand
  - Wheat grain
25. An oxygen enriched atmosphere in a Permit Required Confined Space has \_\_\_\_\_ oxygen present.
- 22%
  - 20.8%
  - 19.5%
  - 23.5%
26. PPE needed for confined space entry is:
- Unnecessary
  - A waste of time and effort
  - Based upon each individual confined space
  - None of the above are correct
27. A four gas monitor is used for testing the atmospheric concentrations of:
- Oxygen
  - Flammable vapors
  - Toxic concentrations of chemicals
  - All of the above

28. The safest type of rescue, for all involved, during a confined space entry is:
- a. Self Rescue
  - b. External Rescue
  - c. Internal Rescue
  - d. None of the above
29. The entry level for flammable atmospheres during confined space entry is:
- a. 10% of the LEL
  - b. 20% of the LEL
  - c. 0% of the LEL
  - d. 10% of the UEL
30. The Entry Supervisor must know:
- a. The hazards an entrant may face during entry
  - b. Signs and symptoms of chemical overexposure
  - c. Consequences of chemical exposure
  - d. All of the above

**SAMPLE**
