

When there's no time to waste. WeatherLink gives you the critical data you need—now!

WeatherLink for Emergency Response Teams with Streaming Data Logger

For use with the free
CAMEO® (Computer-

Aided Management of Emergency Operations) software developed by NOAA and the EPA. With Vantage Pro2 or Weather Envoy, provides the real-time weather data needed to map the footprint of a hazardous plume, predict its dispersion, and help make critical public safety decisions—all at just a fraction of the cost of other systems. For more about CAMEO, visit www.epa.gov/ceppo/cameo.

WeatherLink for APRS with Streaming Data Logger

For ham radio operators, including storm chasers and volunteer weather watchers. Connects a Vantage Pro2 console or Weather Envoy to a ham radio with TNC modem for instant transmission of both your location and the local weather conditions via APRS.

With his chase vehicle outfitted with a Vantage Pro2, John Van Pelt of StormStudy.com keeps an eye on approaching hurricanes and tornadoes.

WeatherLink for Alarm Output with Connector Block

Now you can turn heaters, fans, and other devices on or off using your weather station. Software walks you quickly and easily through the choices—yet the possibilities are almost unlimited! For each of four outputs, you can enter up to eight different weather parameters. Enter threshold values for each, select from nine different test conditions, and link the entries together as you choose. For example, you could activate a fan to cool your house—but only if the difference between the inside and outside temperatures is more than 5°F, it's more than 72°F inside, and it's between 5:00 p.m. and 6:00 a.m. Our connector block provides the interface between your weather station and an electrical device. For high-power devices, you may also need to add electrical relays (not supplied by Davis).

6544 WeatherLink for Alarm Output \$295

WeatherLink for Irrigation Control with Connector Block

Use your weather station to turn your irrigation system on or off. Connector block connects directly to most irrigation systems including Rain Bird, Rain Master, and Toro. For industrial controllers, provides electronic pulses for wind, rain, and ET. For homeowners, looks at rain and ET values to determine when to inhibit watering. Can also set console alarms to inhibit watering when temperatures are too low or winds are too high. ET monitoring requires solar radiation sensor. Connection to a PC is not required except for initial setup.
